Subject: ENDP - Burnt Sienna Drive concern

Hello Heather,

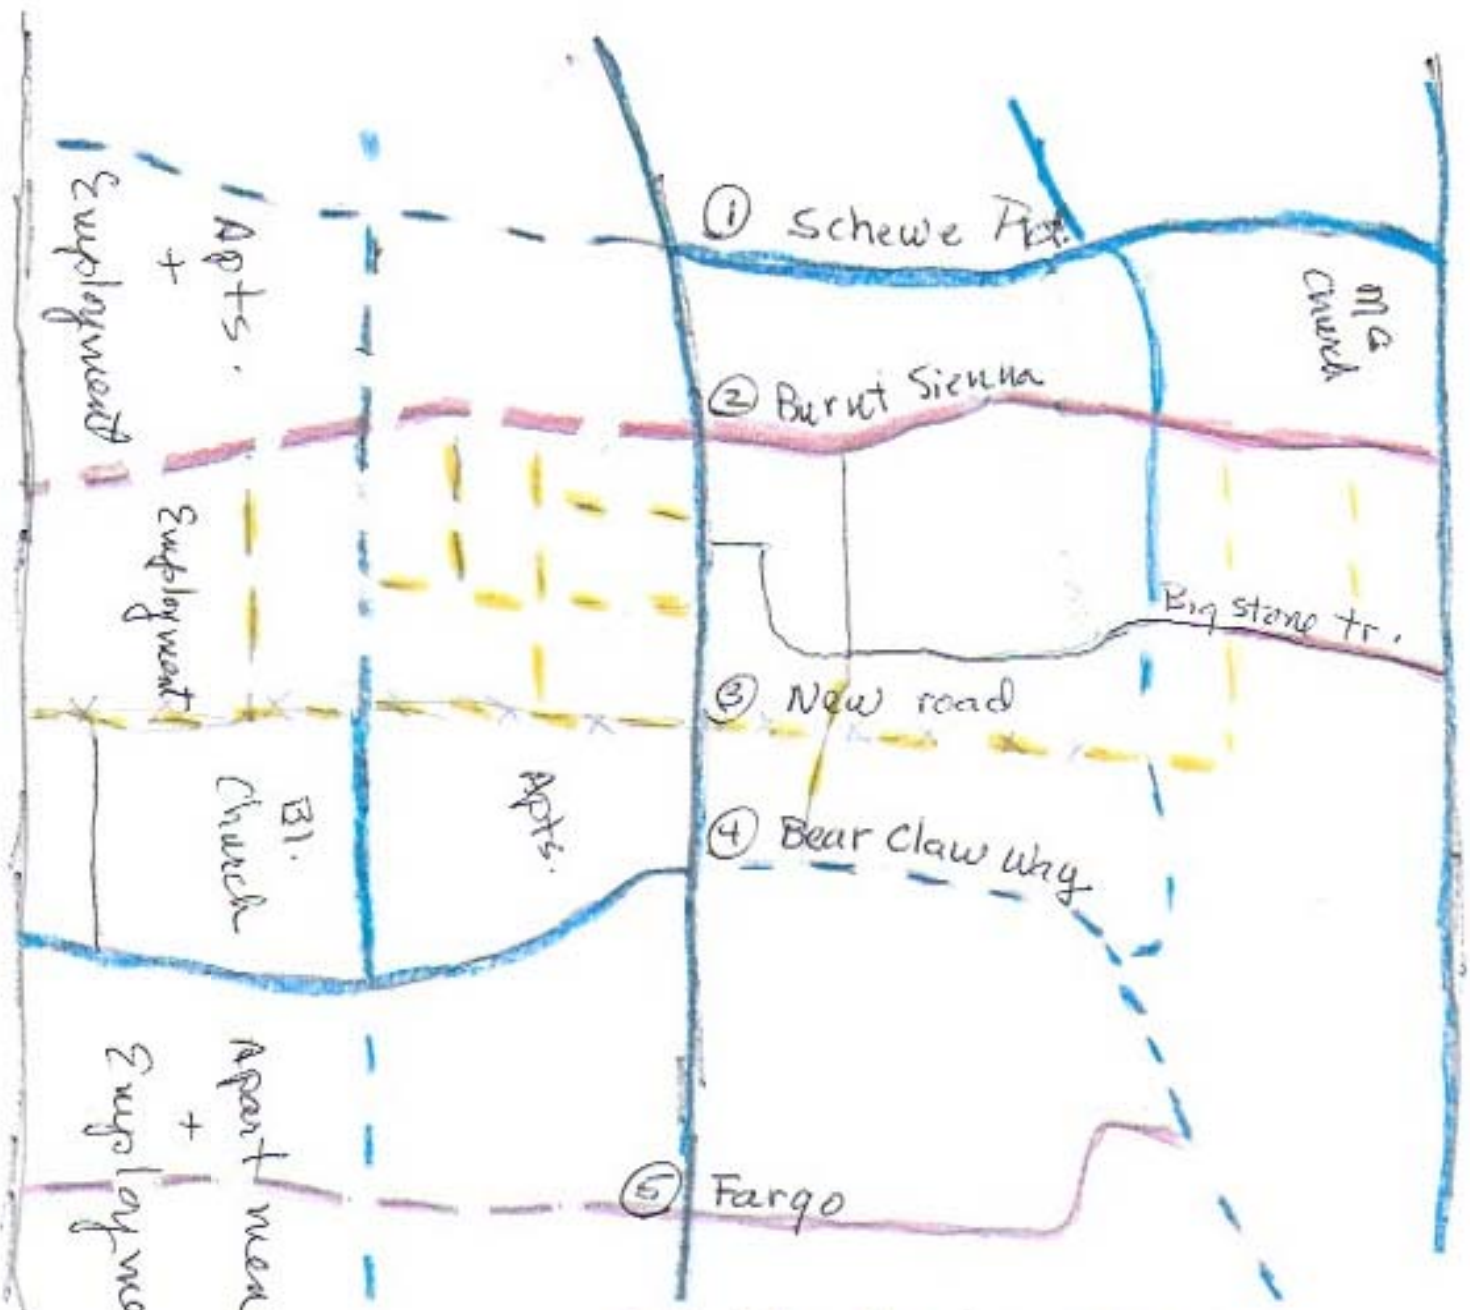

I am a current resident in Burnt Sienna Drive in the Elderberry neighborhood. And i would like to express my concerns regarding the proposed development plan of converting Burnt Sienna Drive in to a collector street to connect Mineral point and Old Sauk. Following are my concerns:

1. When we bought the house in 2016, we did not expect Burnt Sienna local street to be a collector street as there is no mention in the 2002 ENDP. If Burnt Sienna turns in to a collector street, we would be directly impacted by the traffic and cars, which will take away our quite neighborhood living.
2. I have two young children and our street has many young kids and i am concerned about their safety.
3. Our property values may have an impact as well.

Please consider my concerns and provide us with some alternative options that would not turn Burnt Sienna in to a collector street.

Attaching our neighborhood proposal here for your consideration.

Thanks,
Shakila

MAP CODE

— Solid lines: current roads

--- Dotted lines — planned/proposed roads; not built and may not be built for a long time if land is not for sale and/or not planned for imminent development

Colors:

Red — existing local streets whose 2018 status is problematic

Blue — other existing and/or soon to be built connectors and local streets

Yellow — proposed/planned streets; date of construction unknown
