

2014 Dane County Early Childhood Education Demographic Report

Community Coordinated Child Care (4-C)
5 Odana Ct., Madison, WI 53719
608-271-9181 (george.hagenauer@4-C.org)

Enrollment data is from March 2014. Enrollment data below does not include numbers from public school 4 year old kindergarten (4K) or public school run school age programs. Wisconsin Shares enrollment only includes those children from Dane County enrolled in programs within Dane County.

After a year of decreases, enrollment and capacity again has again increased. . There was again a drop in enrollment under Wisconsin Shares- part of which may be due to low income families using Madison’s relatively new 4K program. The number of children in high quality accredited programs increased, probably due to the new YoungStar program. The above chart does not include public school kindergarten enrollment, pre-kindergarten at risk programs or on school site public school 4 year old kindergarten programs. A chart covering unlicensed public and private school programs for children under age six is on page 2 of this report.

There was also an increase in school age program enrollment – it seems due to several existing sports and arts focused school age programs becoming regulated. **Overall there is an estimated 1800 empty slots in regulated family child care, full day group centers and school age programs in Dane County.** While a large number, it is less than last year.

Part day preschools saw an increase leaving only Family child care with a decline this year continuing recent trends. Almost all of the losses were in certified and provisional family child care. Hopefully this will improve if child care subsidy rates improve next year. Overall child care enrollment indicates that Dane County is coming out of the recession. Cost was a major deterrent to using regulated care indicated by parents in a small 4-C study in 2012 though the study also indicated that millennial parents wanted to spend more time with their children and thus use child care less.

In this report there will be some minor variations in terms of total enrollments between some of the different geographic charts involving the City of Madison. This is usually due to the fact that census tracts and neighborhood planning areas vary and often include areas outside the city. In some cases the data can be limited to just the city of Madison and in others the data cannot. Throughout this report there will be references to the new YoungStar rating system for child care and early childhood education programs including an analysis of the number of programs at the various quality rating levels in each zip code in Dane County. .An explanation of YoungStar is on page ___

Public School Programs in Dane County for Children under Age Six 2013-2014

Public Schools in Dane County increasingly are providing additional programs for children under age 6. These include: pre-kindergarten programming for children at risk (listed on the chart as pre-k); regular kindergarten for children age 5, usually offered in a full day format; and 4 year old kindergarten (4K). There are also private schools offering both 4K and kindergarten which are exempt from state licensing.

4 year old kindergarten (4K) is offered now by all but one school district in Dane County. 4K is usually offered as a part day program. The models for it vary from district to district. Depending on the district locations, it can be either in the local public schools or by subcontract in various state licensed child care, preschools or head start programs. The arrangements for the latter vary from district to district. Quite often the district provides the state certified teachers but in some situations the state certified teacher is on the staff of the center.

The data in the following chart is taken from the 2013-2014 public and private school annual enrollment report on the Wisconsin Department of Instruction Website. It is presented by school district not municipality. 4k data is presented in total for each district but also split between in public school and in licensed programs categories. The 4k enrollment data for state licensed programs should be included as part of the preschool numbers in the other charts within this report. The in school 4k data, the Kindergarten and pre-K numbers represent children in programs but which are not included in the other charts in this paper which are limited to state regulated programs outside the public schools. If you add in the public school preschool numbers to the total in regulated care there are 14,587 children in some type of preschool program in Dane County (and that does not include 5,678 five year olds in regular kindergarten). These figures need to be considered when planning additional preschool care or early childhood programs.

**Child Care Capacity in Dane County
March 2014 by Type of Program**

Since part day programs can have multiple shifts only capacity figures of family child care, full day group centers and after schools were analyzed. Capacity increased this year in spite of a decline in family child care.

zip	Capacity Family Child Care 2013	Capacity Family Child Care 2014	Change 2013 - 2014	Capacity Full Day Centers 2013	Capacity Full Day Centers 2014	Change 2013 - 2014	Capacity School Age 2013	Capacity School Age 2014	Change 2013 - 2014	Total Capacity 2013	Total Capacity 2014	Change 2013 - 2014

School Age Enrollment by Type of Program by Zip Code March 2014

This chart includes on site programs run by the Madison Public Schools (MSCR). Note the Madison School District has slightly different boundaries than the Madison city limits. On site school age programs include children under age 6. The column for other care only counts children age 6 and up.

School Age Enrollment by Madison Public Elementary School Attendance Area March 2014

The Madison School District includes some areas outside the City of Madison. Programs outside school buildings were assigned to the nearest school attendance area unless enrollment was identified to a particular school. This covers only regulated programs providing care for children after school. Not included are unregulated community centers, for profit and non-profit sports, arts and other interest centered programs. For more details see the 2014 MOST study.

**Children Supported by Wisconsin Shares Subsidies in March 2014
Analyzed by Zip Code in Which They Are Enrolled**

%change relates to the difference between the March 2013 and March 2014 numbers of children supported by Wisconsin Shares. Numbers are based on where children were in care not where they lived. This is the second year of decline in use of Wisconsin Shares by low income families in Dane County

**Children Supported by Wisconsin Shares Subsidies in March 2014
Analyzed by Zip Code in Which They Live**

Children are not necessarily in care near where they live since many parents prefer to have their children in care where they work. This chart provides a count of low income children on Wisconsin Shares subsidies by the zip code in which they live and compares that to the number of children on subsidies in care in each zip code and the number in 2013.

This is only part of the number of low income children in early childhood programs. It is estimated an additional 3865 low income children are in Head Start, the University's CCTAP program, Madison's Child Care Assistance program or the Public School 4K/Kindergarten.

Children Enrolled in Accredited Care by Zip Code March 2014

Accreditation is a process by which an early childhood program can be certified as meeting higher standards than those required by state regulation. There are several types of accreditation available to programs including one done by the City of Madison child care unit which set up a local accreditation program before any national ones existed. This chart shows the number of children in high quality accredited care within the county. The Percent in accredited programs column is the percent of all children enrolled in care that are in accredited programs.

The YoungStar Child Care Rating System

The State of Wisconsin is implementing a rating system for child care, early childhood education and school age programs. The system is based on programs attaining one to 5 stars. The following page briefly explains how programs obtain the various stars in the ratings.

Reading the Stars: Understanding the 5-Star Quality Rating and Improvement System

How Can YoungStar Help Parents and Families Choose Quality Child Care?

Making an informed choice about who will care for our children while we are working is one of the most difficult and important decisions a family can make. YoungStar is a five-star quality rating and improvement system that supports families in making this decision. The rating-scale recognizes practices that early learning settings have in place that are proven to be good for kids. YoungStar gives families a snapshot of a program's quality to compare with their own views on quality child care. Programs can be meeting quality standards to some degree at 2, 3, 4, and 5 stars. The address for the search is:

www.youngstar.wi.gov

In addition to this snapshot, families can get further support in understanding a rating and receive a customized referral through their local Child Care Resource and Referral agency. To learn about an agency in your area, please call 1-888-713-KIDS (5437) or visit: https://supportingfamiliesogether.org/CCR_R.html

What Does Each Star Rating Mean?

A provider's star rating is based on these four categories of quality:

Provider Education and Training Children benefit when their teachers and caregivers have a solid foundation in early care and education principles and practices. YoungStar acknowledges the academic achievement of teachers/caregivers and administrators.

Learning Environment and Curriculum When teachers and caregivers create meaningful experiences for infants and young children, they are more likely to have long-term school success.

Business and Professional Practices How programs do business matters. Well-respected, fairly-compensated professionals, who are actively maintaining professional standards and business practices and engaging families, are better able to respond to meet the needs of children and their families.

Health and Wellness Children grow up in the context of their families, communities, and culture. These standards look at the outcomes of the whole child from nutrition and physical activity to meeting special needs and being responsive to how kids form relationships.

How Do Providers Earn Their Star Rating?

YoungStar program staff at the local level provides on-site technical consultation and independent review and assessment to programs. Consultants review programs for evidence of meeting quality indicators related to the four quality categories.

YoungStar uses compliance with existing child care regulations as a base. For the purposes of YoungStar, programs are considered to be in regulatory compliance unless they have had their license or certification revoked, denied or suspended. With compliance intact, programs can then achieve a star level. Star levels are earned on a point scale of 0-40 with each star level having minimum requirements that must be met.

2 Star Automated: Program has submitted required paperwork to meet minimum state mandated requirements but in most cases has decided to bypass YoungStar quality improvement technical consulting.

2 Star: Program has earned 0-10 points and is actively participating in quality improvement efforts with a quality improvement technical consultant.

3 Star: Program has met the minimum requirements for the star level and earned 11-22 points.

4 Star: Program has met the minimum requirements for the star level and earned 23-32 points.

4 Star Automated:

Program is an accredited group or family child care that meets the 4-star educational requirements.

5 Star:

Program has met the minimum requirements for the star level and earned 33-40 points.

5 Star Automated:

Program is a group or family child care that meets national or state accreditation standards as recognized by DCF and meets the educational requirements for the 5-star level. Head Start, Early Head Start and Tribal Head Start programs that meet Head Start performance standards as verified through the triennial review process will be awarded a 5-star.

For more information about minimum requirements, visit: http://dcf.wi.gov/youngstar/pdf/minimum_points_required.pdf

**Child Care and Early Childhood Education in Madison
A Neighborhood Analysis March 2014**

Explanation of the charts:

A map for the census tract areas follows. All data relates to programs regulated under state law in March 2014.

Infant –Toddler. is the count of children under 2 in early childhood programs in March 2014.

Preschool is the count of children age 2 through age 5 in early childhood programs in March 2014.

School Age is the count of children 6 years old or older in early childhood programs in March 2014.

Total Capacity is number of regulated slots in March 2014

Excess Capacity is the difference between regulated capacity and total enrollment. It may underestimate the number of available slots due to some children attending part time. Some Madison census tracts boundaries are different from City of Madison boundaries which is why the totals for this chart will differ from totals for the City of Madison based on actual boundaries used elsewhere in this report.

City of Madison 2000 Census Tract Jan 2007

Legend

- 2000 Census Tract
- 2000 Census Block Group
- Madison City Boundary

Market Share of Accredited Program Enrollment by Census Tract March 2014

Accredited program totals are based on City Accredited programs. Negative numbers in excess capacity are due to multiple part time children filling single slots. There are also some accredited programs just outside the city and not included in this chart.

Sector	Census Tract	Total Enrollment	Accredited Enrollment	% Accredited	Regulated Capacity	Accredited Capacity	% Excess Accredited	Capacity

Children Enrolled by City of Madison Municipal Planning Districts 2014

A Planning District Map can be found on the City of Madison website in the Planning Department under Neighborhood Indicators. A small copy is included in this report. E codes are East. W Codes are West. C is Central. Totals may differ from other charts as Planning Districts sometimes include space outside the city limits.
