## Administrative:

• Coronavirus message to staff.

MFD Members,

Guidelines have been updated for the treatment/transport of patients suspected of having the Coronavirus.

Please follow the below recommendations, and also see the link to the CDC website:

1. Apply droplet mask to any patient suspected of having the Coronavirus (travel to China with fever and/or respiratory symptoms), as well as to **any patient** with signs/symptoms of respiratory infection, fever, or general illness without another obvious cause.

2. Mask MFD members with an N95 mask, and approach cautiously maintaining a 6-foot distance until patient and provider are masked.

3. Wear eye protection

4. Wear disposable gowns – Use yellow gowns from hospital linen supply, Tyvek suits, or future disposable gowns to be purchased by MFD.

5. Wear disposable gloves

## Additional Considerations:

1. Assure all materials and equipment used in patient care are fully cleaned according to label instructions, with department-provided cleaner/disinfectant.

a. Consider BP cuffs, stethoscopes, radios, tablets, SPO2 devices, cardiac monitors, etc. Anything used in patient care.

- 2. Use ambulance exhaust fan during transport.
- 3. Family members and other contacts of the patients should **NOT** ride in the ambulance.
- 4. Ambulance driver should maintain N95 use during transport.

5. After transport, all ambulance and cot surfaces should be fully cleaned according to label instructions, with department provided cleaner/disinfectant.
