Subject: Hammersley Rd & Whitney Way Intersection

Hello Bob,

My husband & and I live at 5606 Hammersley Road and received notice of the construction of a directional median at this intersection. We believe that this resolution is the best option of many suggested at neighborhood meetings. We appreciate that the City used a data driven decision-making process, and the option presented will be most effective at eliminating hazards at that intersection. Returning to our home will change for us, but we believe that this is in the best interests of all people using the intersection.

Question: Do two lanes remain each way on Whitney Way with a third turn lane carved out of the current median? I assume so.....but it is difficult to tell from the drawing. Sorry, we cannot be at the public hearing to support this effort.

Best wishes,

Christine Beatty & Fred Kauffeld
