To Whom It May Concern,

I am currently a resident at 114 Leon. On June 17th at 4pm, I participated in a test of the Garver Feed Mill's proposed audio programming from its north patio.

Having participated, I can attest that the sound from the audio programming was consistent with street level noise and there was no discernible disturbance to our quality of life.

As a resident of the property adjacent to the Garver Feed Mill, I support Garver's proposal to provide amplified programming at an average of 70 decibels at the source of sound for ambient amplified programming and an average of 90 decibels for live amplified live programming at the source of sound until 30 minutes before closing time on the Garver patio.

Sincerely,

[Quoted text hidden]

To Whom It May Concern,

I am currently a resident at 141 Leon Street. On June 17th at 4pm, I participated in a test of the Garver Feed Mill's proposed audio programming from its north patio.

Having participated, I can attest that the sound from the audio programming was consistent with street level noise and there was no discernible disturbance to our quality of life.

As a resident of the property adjacent to the Garver Feed Mill, I support Garver's proposal to provide amplified programming at an average of 70 decibels at the source of sound for ambient amplified programming and an average of 90 decibels for live amplified live programming at the source of sound until 30 minutes before closing time on the Garver patio.

Sincerely,

Amber Gray

Date: June 17, 2020

To Whom It May Concern:

I am currently the owner of the property at 118 Leon St. Madison, WI

As the owner of the property adjacent to the Garver Feed Mill, I support Garver's proposal to provide amplified programming at an average of 70 decibels at the source of sound for ambient amplified programming and an average of 90 decibels for live amplified live programming at the source of sound until 30 minutes before closing time on the Garver patio.

As a musician, I support this, because live music venues have been decimated since the start of the pandemic. Having a place to perform for others is something I and all of my musical friends are yearning for.

Based on my experience, I can also attest that the sound from the audio programming levels will be consistent with street level noise and there will be no discernible disturbance to our quality of life.

Sincerely,

Mark Harrod

Hey Bryant,

Below is the completed email you asked for. Please let us know if there is anything else we can do to help, and fingers crossed all goes smoothly for you and you can expand the patio this summer!

Thanks!

Tammy & Lucas
