Hello my name is Deja Greer . I am a JR at LaFollette . I have been working on getting a bus for almost 2 1/2 years . We need a bus because people near me need to get to work and other places . If people had summer school they wont be able to go because they would have no transportation . If i wanted to go to college next year i would not be able to because i would not have any transportation there and back and my sister also is done with school and want to go to college and she have no way also . I think it is very important that we get one in our neighborhood .
