DESCRIPTION

Replace 20 windows in home. 10 windows on first floor and 10 windows on second floor. Each floor will have 9 Double-Hungs and 1 Picture. Windows are going into existing openings. No size changes. The front 2 Picture windows are #102 and #202 on the provided diagrams. These two windows will have a Full Divided Lite Grille (horizontal) on upper part of the window to match existing grille location. The interior casing will remain. The exterior will be cladded in aluminum in the color Black to match existing. Windows will be White interior and exterior.

Renewal by Andersen description

Energy Efficiency

Superior thermal insulating properties helps your home stay warmer in winter and cooler in summer and can help you save money on your energy bills.

Plus, 40% of the raw material by weight used to make Fibrex® material is reclaimed wood fiber. Our windows are Green Seal certified, and available with glass options that make them ENERGY STAR® certified—so not only will your home stay more comfortable, you can help keep your corner of the world is just a little bit greener.

Strength and Durability

Twice as strong as vinyl, Fibrex® material means weathertight seals stay weathertight. Its durable nature means that it can stand up to even the most extreme temperature swings, maintaining its stability and rigidity in all climates.

Low Maintenance

Your Renewal by Andersen® windows are warranted not to flake, rust, blister, peel, crack, pit or corrode.⁺ And years down the road, they will be as easy to operate as the day they are installed.*

Beauty

The strength of Fibrex® material means narrower frames; narrower frames mean more glass—and more view. Plus, the extrusion process allows us to craft your windows to any shape—meaning you can match the architectural style of your home...or define a new look.

The process also fuses the color into the material, offering you a wide palette of long-lasting colors⁺ to choose from—including dark exterior colors not found with most other replacement windows.

With stainable wood interiors including oak, maple, and engineered pine, 11 hardware finishes, and a variety of grille patterns, including colonial, prairie, and custom-designed, you can match your new windows to your home's current architecture, change your look, or complete a historically accurate renovation.

Double-Hung

Picture Window (added line where approximate location of Full Divided Lite Grille will go).
