

City of Madison/MGE Work Plan

This work plan is intended to serve as a framework for ongoing commitments on the part of Madison Gas & Electric (MGE) to help the City of Madison (City) achieve its energy-related goals, as reflected in the City's Sustainability Plan. In prioritizing the work to be formed in accordance with this Work Plan, MGE will consider the following:

- City residents and MGE customers can use energy information to make energy-related decisions and plan actions and investments in accordance with local, state and federal law:
 - Aggregated usage and program participation data
 - Benchmarking
 - Smart Meters

- Strengthen grid to support DG
 - Subsidize customer purchase of powergrid technology
 -
 -
 -

- Reducing energy costs to businesses and residences
 - PACE
 - Address insurance requirements to remove disincentives for small solar installations (Alliant as model?)
 -
 -

- Addressing equity of services by reducing residential and multi-family energy costs
 - Education and outreach
 -
 -

- Increasing economic and job development training
 - City investment in workforce training to boost green buildout (panel installers, energy auditors)
 - Promote/enhance M-Power (funding and soft support)
 -

- Reduce greenhouse gas emissions
 - Invest in small scale solar (city help in addressing stranded cost issues)
 - Large scale solar (greater than 20kw)
 - Increase clean energy infrastructure to support electric vehicles
 - LED street lighting

- Meet goals for renewable energy usage
 - Develop tariff modeled after NSP-Wisconsin community solar garden tariff (recently approved in PSCW Docket No. 4220-TE-101)
