Chart of Identified Problems

	Priorities noted below were developed from information gathered from the members of the Parking Council for Persons with Disabilities (PCPWD)			
No.		Priority	Comments	Solutions
1	There are no standards for providing on-street parking for persons with disabilities in residential or commercial areas.	*	Should be covered with revision to national ADA standards	
2	Signing for parking for people with disabilties. Building inspection should verify that signs are correct before approving a building for occupancy.			
3	Needs of disabled community should be considered when street furniture is being reviewed during planning process
