Subject: Project 11190

I have interest in virtually attending the public meeting tomorrow Wednesday, October 7

Helen Urbain
205 Jackson

My property on the assessment sheet shows a smaller than existing apron being put back in and it shows 40ft of my curb and gutter being removed which was already replaced recently when the project on Bashford was completed on a recent project.

I have a brick sidewalk from the main sidewalk to the street. Does that need to be removed prior to construction or only if it impacts sewer?

Due to street parking layout, my existing apron barely allows me to get out of my driveway when people are parked on my side of the street and across the street. It cannot be made any smaller- I would request it be made even wider but not any less than it currently is.
