Re: Letter of Intent
826 Williamson Street – Letter of Intent
KBA Project #2241

Heather Bailey,

The following is submitted together with the plans and application for the Landmarks Commission's review and consideration:

This proposed development involves the redevelopment of 826 Williamson Street, which is located within the Third Lake Ridge historic district, by removing an existing one-story commercial building and surface parking lot and constructing a new three to four-story mixed use building. There will be a total of approximately 45 apartment units (subject to final unit size mix) and approximately 3,500 sq.ft. of commercial space. There will also be 50 underground parking stalls for residential use.

The structure to be removed was constructed outside of the period of significance for the Third Lake Ridge historic district (1850-1929) and has no historic significance to this area. It is also out of character and is not a landmark structure, nor is it of an uncommon or unusual design or method of construction, and as such should meet the demolition criteria.

As part of this project the underlying land (3 lots facing Williamson Street) that the existing and the proposed building will sit on needs to be combined into one lot. This land combination has already been reviewed and approved by the Landmarks Commission and a certificate of appropriateness was approved on 6/6/2022.

The proposed building has been designed to be in context with the neighboring structures while not trying to look like a false historic structure.

The front façade is 135' long and will be all masonry, broken into 3 sections. The Western portion (slightly more than 1/3 of the frontage – 53') will have commercial space on the ground floor with storefront glass and either corner or recessed entrances to the commercial spaces consistent with other buildings along Williamson Street. There are 2 floors of apartments above before a stepback at the 4th floor where there are additional apartments.

The Eastern portion of the façade (less than 2/3 of the frontage – 71') will be fully residential, with 2 walk up stoops. This portion of the façade is set back 4' from the commercial section of the building, creating more space between the sidewalk and the ground floor apartments. The first floor of this portion is 2'-8" above the sidewalk. The second and third floor section of the façade has two protruding

bay windows similar to the ones found further down the street on 1201 Williamson Street (but 2 stories tall instead of 1). At the fourth floor the building steps back to the same distance as on the commercial part.

Between the two sections of the façade is a smaller, more recessed, section just under 12' wide. This portion is the primary residential entrance to the building (zoning requires that this entrance face Williamson St). The masonry on this portion is a medium gray brick to help create a clear separation between the commercial and residential sides.

The side façade facing the surface parking area off of Williamson street (on the west side of the proposed building) will be designed in the same manner as the commercial portion that faces directly onto Williamson Street – with the same details and materials.

The height of the building at the 3rd floor stepback is 39'-8", while the overall height of the building with a flat roof is 50'-6". Putting it into the same massing context as other buildings on Williamson Street while conforming to the Williamson Street Build II requirements.

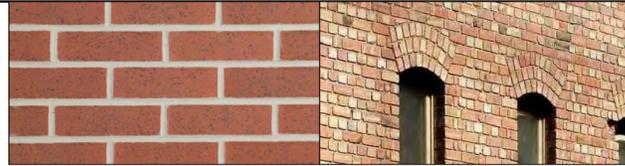

We hope that you will find this an appropriate building that will fit in well in the Third Lake Ridge historic district. I look forward to discussing these with you at the upcoming Landmarks Commission meeting.

Thank you for your time reviewing our proposal.

Sincerely,

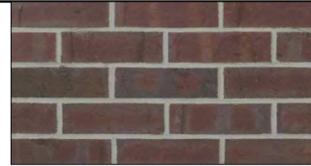

A handwritten signature in black ink that reads "Kevin Burow". The signature is written in a cursive, flowing style.
