

SECURITY PLAN

1-This safety plan is an organization plan for all restaurant workers

2-The restaurant will keep functioning as a restaurant, it will not be a club or a bar. The restaurant lights will always be on and all people will be accommodated at tables and will be served by waiters and the alcohol will be provided by a licensed bartender.

3-The main reason for extending the hours is for the purpose of celebrating small Parties , Birthdays. moving them to that schedule does not interfere with our dinner service.

3- The beer bottles will be all open and there is a control and policy of not taking out or entering alcohol into the restaurant. We will make a review when entering and leaving the establishment. by the security team that will be kept at the main door of the restaurant.

4-The employees of the restaurant will be in contact with the customers all the time and the manager will be periodically checking the parking cameras through the security cameras to see if any suspicious activity could occur.

5- Any person who shows signs of intoxication will immediately stop selling alcohol. No activities will be allowed where alcohol is brought, the restaurant will be the one who supplies and sells

personnel will be at the front door and in the parking lots for an exit in order without conflicts of any kind. It will help to organize and order the exit of the cars fluently.

7-The sound and lighting of the restaurant will be amplified but will not interfere with the restaurant environment, which allows for proper communication with the restaurant employees as well as the employees' vision for customer behavior. There will be music karaoke and a space to dance but most of the time it will be karaoke.

8-The restaurant staff is in charge of cleaning the bathrooms periodically and they will be accompanied by the security staff to monitor and control any situation that may arise in the area of the bathrooms

9- In the event that a person has drinking more than is supposed, a taxi will be offered to refuse and if they want to drive their own vehicle, the police will be called immediately.

10- In case of an argument or any attempt of physical or verbal aggression, the manager, the security team as well as the employees will talk with the parties involved and will immediately be asked to leave the restaurant, to avoid an even bigger problem. First, the first person involved will be asked and their vehicle will be escorted and then the second person will be asked to not let the conflict continue in the parking lot.

11- If any situation gets out of control and exceeds our ability to control, we will immediately call the Police to mediate in the way that we are not trained. Most of the staff have more than 15 years working in events every weekend in other locations and private events. Periodically there are safety meetings and strategies to control cases, emergencies or any inconvenience. Our priority is on the proper handling of the alcohol for individual guests to avoid conflicts by the alcohol. No person leaving the restaurant must be able to drive their vehicle or be reported to the police immediately if this person insists on driving.

Paco's Tacos will be utilizing its entertainment license for the purposes of having the ability to have live music and singing at the restaurant. We plan on having karaoke night as well as having live music for our evening dine-in customers to enjoy, or so that if we have a private event (i.e. birthday party), the customer can have the option of having live music. As for karaoke nights, we think it will add a nice option to the area where people can enjoy themselves and others while having good food and drink.

Our current hours of operation are Monday thru Friday 11am to 8pm. With the entertainment license, we may extend our hours for Thursday, Friday, and Saturday to maybe 10pm. However, we will not have live music or karaoke during lunch and afternoon hours (maybe with the exception of Saturday afternoon, and the exception of any private events).

We would like to also note that our facility at 1331 Greenway Cross does have a side banquet room where we could have a separation of regular dine-in customers and those who want their private event and music. Below is a floorplan that shows the layout of the facility.
