

# Route 33

-  Approved route
-  Eliminate route
-  Append route

Curb bump on south side of Milwaukee and island in median of Wind Stone hinders eastbound right turn from Milwaukee

Island in median of McClean hinders southbound right turn from Galileo

Circle in intersection of Apollo hinders through movement along North Star

Chuck-

Please find attached a map that was sent around a few months ago regarding the Route 33 revisions.

Drew-

Chuck was wondering if you or I would need be present for the TPC this coming Wednesday, available to answer any questions not answered by the map overview (and accompanying text).

Please find attached planned revisions to Route 33 to address sub-optimal turning movements that were recently investigated.

The attached revisions were designed to minimize the impact on work that had already been completed for the Fall service changes (i.e. bus stop work orders, system maps, departure time displays).

The planned Route 33 revision to using Wyalusing between Milwaukee and Littlemore will also impact supplemental school day trips. Those trips will also change to use Wyalusing between Milwaukee and Littlemore - in order to eliminate the right turn movement identified at Wind Stone.
