August 6, 2023

To: Transportation Commission Members
From: Stefanie Cox, Parking Division Manager
Subject: Removal of Residential Permit Parking from Sheboygan Ave.

The Parking Division was asked to conduct an analysis of the Residential Parking Permit Program (RP3) on the 4700 – 5000 blocks of Sheboygan Ave for an upcoming road reconstruction project. The proposed re-design would remove parking from both sides of the street to allow for bikes lanes, bus traffic, and loading areas.

Background

The purpose of the Residential Permit Parking Program (RP3) is to provide parking relief to residents living in areas impacted by commuter parking. A neighborhood can petition to have their street included in the RP3 program by requesting a study and having at least 50% of the residents in favor of the change. Records show this location was added to the program in 1987, likely by petition from area residents.

Results

A study was conducted over four separate days on 4/29, 4/30, 5/2, and 5/4, between the hours of 8a-8p. The results found an average of nineteen (19) vehicles parked on Sheboygan Ave between the hours of 8a-4p. This included both permitted and non-permitted vehicles. Residential permits are valid Monday – Friday, during the hours of 8a-6p. Based on our records, a total of thirteen (13) permits were sold during the 2023 permit season to addresses on Sheboygan Ave.

Area 20 Permit Locations

Recommendation

It is my recommendation that the RP3 permit parking be removed from Sheboygan Ave., pending approval of the new road design. The proposed road design does not allow for parking and would not be able to accommodate the permit parking.
