PUBLIC COMMENT

UNFINISHED BUSINESS

1. [10903](#) 2202-2224 South Park Street - Master Plan Update/Revision, Modifications to a Planned Commercial Site (The Villager Mall) in Urban Design District No. 7. Ald. Dist. 14.

The motion noted that the plan has come far in terms of massing and the arrangement, but has a lot of issues in terms of landscaping plan and requires refinement based on comments and suggestions by the Commission. Upon final consideration, want to see alternatives on traffic flow and parking, including the sense of how Park Street looks as it relates to landscaping and other elements, and the following:

- The hierarchy of traffic flow through the site needs to be examined more as to how it functions.
- Initial approval is based on the understanding that the basic building placement, proposed demolition of existing buildings and the basic parking configuration is acceptable, but details of public plazas' entry points are still to be investigated.
- Trees along Park Street should be provided at 40-feet on center.
- Investigate moving southerly building west to obtain more greenspace, in combination with flipping of surface parking stalls and the use of small stall parking bays.
- Address connectivity from Buick Street to the face of the Atrium building.
- Consider moving/adjusting northerly drive aisle entry's alignment with the main drive aisle off of Ridgewood Street.
- Study hierarchy of vehicular access, consider doing away with Atrium drive aisle entry.
- Close southerly drive aisle off of Hughes Place and relocate northerly to provide an offset to the main drive aisle along the front of the Atrium plaza to discourage cut-thru traffic.
- Expand greenspace along Park Street, including in front of the Urban League/library building to create a better space.
- The northeast building shall be two stories in height.
- Still uncomfortable with relationship of Urban League/library building to the Buick Street entry, especially the blankness of the building's façade.

Relative to the Phase I/Atrium improvements, a motion for referral by Wagner, seconded by Rummel, noted the need for more details on the project. The motion passed on a vote of (8-0-1) with Luskin abstaining. The motion for referral noted the need to address the following:

- Like material and overall design but don't get a sense of the proposed "international flavor."
- Concern with curved elements on upper portions of the Atrium façade, not budgetary as well as resolve issues about what happens at the column.
- On signage, the atrium sign is not in keeping with the new architecture; not sympathetic to new architecture.
- Like where architecture is going generally, but need more details.

- Provide lighting and photometric plans upon final consideration.
- Provide an architectural tie or theme for both Phase 1 and future Phase 2 improvements such as the round element on the Harambee building or a new theme created with the updated façade improvements.
- References to clarifications contained in a memo by Mayor David J. Cieslewicz in support of the Amended Villager Master Plan were cited in providing substantiation for its approval by the Commission as a departure from standards typically required for a private commercial based retail project.
- Look at pedestrian access to adjacent apartments to the west.
