## 2015 Dane County Early Childhood Education Demographic Report

Community Coordinated Child Care (4-C)  
5 Odana Ct., Madison, WI 53719  
608-271-9181 (george.hagenauer@4-C.org)

Enrollment data is from March 2015. Enrollment data below does not include numbers from unregulated public/private school preschool or after school programs- those are covered later in the report. Wisconsin Shares enrollment covers only children from Dane County. **The large change between preschool and school age children is the result of reclassifying 5 year olds as school age as opposed to preschool.** School age programs had a slight increase in enrollment.

Overall enrollment was flat. . There was again a slight drop in enrollment under Wisconsin Shares. The number of children in high quality accredited programs was flat while capacity increased . A chart covering unlicensed public and private school programs for children under age six is on page 2 of this report. **25% of the preschool enrollment in state licensed child care is currently funded at least partially by the public schools.**

**Overall there is an estimated 1856 empty slots (about 10% of total capacity) in regulated family child care, full day group centers and school age programs in Dane County.** This is slightly more than last year.

After years of decline, family child care saw an increased enrollment this year including in certified and provisional family child care. Overall child care enrollment indicates that Dane County is coming out of the recession. Cost was a major deterrent to using regulated care indicated by parents in a small 4-C study in 2012 though the study also indicated that educated millennial parents wanted to spend more time with their children and thus use child care less.

In this report there may be some minor variations in total enrollments between some of the different geographic charts involving the City of Madison. This is usually due to the fact that census tracts and neighborhood planning areas vary and often include areas outside the city. In some cases the data can be limited to just the city of Madison and in others the data cannot. Throughout this report there are references to Wisconsin's YoungStar quality rating and improvement system for child care programs, including an analysis of the number of programs at each of the various quality star ratings in each zip code in Dane County. An explanation of YoungStar is on page 21.

## Public School Programs in Dane County for Children under Age Six 2014-2015

Public Schools in Dane County increasingly are providing additional programs for children under age 6. These include: pre-kindergarten programming for children at risk (listed on the chart as preK); regular kindergarten for children age 5 (5K), usually offered in a full day format; and 4 year old kindergarten (4K). There are also private schools offering both 4K and kindergarten which are exempt from state licensing.

Publicly funded 4 year old kindergarten (4K), usually offered as a part day program, is offered in all Dane County school districts. The models for it vary from district to district. Depending on the district, it can be either in the local public schools or by subcontract in various state licensed child care centers, preschools or head start programs. The arrangements for the latter vary from district to district. Quite often the district provides the state certified teachers but in some situations the state certified teacher is on the staff of the center.

The data in the following chart is taken from the 2014-2015 public and private school annual enrollment report on the Wisconsin Department of Instruction Website. It is presented by school district not municipality. 4k data is presented in total for each district but also split between in public school and in licensed programs categories. The 4k enrollment data for state licensed programs is included as part of the preschool numbers in the other charts within this report. The in school 4k data, the Kindergarten and pre-K numbers represent children in programs but which are not included in the other charts in this paper which are limited to state regulated programs outside the public schools. If you add in the public and private school preschool numbers to the total in regulated care there are 13,659 children in some type of preschool program in Dane County (and that does not include 5,531 five year olds in school kindergartens). These figures need to be considered when planning additional preschool care or early childhood programs. See chart on page 7 for zip code analysis.

**Enrollment in Dane County March 2015 by Zip Code  
And Including Public and Private School Preschool Enrollment**

Since Public and private schools not licensed by the state are playing an increased role in serving preschool children under age 5. This charts adds those enrollment in those programs to the enrollment in state regulated child care and early childhood education programs in each zip code. This does not include children in Kindergarten.

### Child Care Capacity in Dane County March 2015 by Type of Program

Since part day programs can have multiple shifts only capacity figures of family child care, full day group centers and after schools were analyzed. Capacity increased slightly this year in spite of a decline in family child care.

zip	Capacity	Capacity	Change	Capacity	Capacity	Change	Capacity	Capacity	Change	Total	Total	Change

## Comparison between Capacity and enrollment by Zip Code March 2015

Note slots available may be an underestimate due to the many children who attend part time. 4-C can do additional analysis on request.

### School Age Enrollment by Type of Program by Zip Code March 2015

This chart includes on site programs run by the Madison Public Schools (MSCR) which are not included in some other charts. Note the Madison School District has slightly different boundaries than the Madison city limits and thus totals may vary from other charts. Counted are all children reported age 5 or more. Not included are unregulated private school programs or other unregulated programs for older children.

## School Age Enrollment by Madison Public Elementary School Attendance Area March 2015

The Madison School District includes some areas outside the City of Madison. Programs outside school buildings were assigned to the nearest school attendance area unless enrollment was linked to a particular school or was exclusively for a private school. This covers only regulated programs providing care for children after school. Not included are unregulated community centers, for profit and non-profit sports, arts and other interest centered programs. These serve many children especially those over the age of 8. For more details see the 2014 MOST study for the Madison schools.

**Children Supported by Wisconsin Shares Subsidies in March 2015  
Analyzed by Zip Code in Which They Are Enrolled**

%change relates to the difference between the March 2015 and March 2014 numbers of children supported by Wisconsin Shares. Numbers are based on where children were in care not where they lived. This is the fourth year of decline in use of Wisconsin Shares by low income families in Dane County. 5 year old children this year are grouped with other school age children since the overwhelming majority of 5 year olds are in kindergarten and thus in after school programs.

**Children Supported by Wisconsin Shares Subsidies in March 2015  
Analyzed by Zip Code in Which They Live**

Children are not necessarily in care near where they live since many parents prefer to have their children in care where they work. This chart provides a count of low income children on Wisconsin Shares subsidies by the zip code in which they live and compares that to the number of children on subsidies in care in each zip code and the number in 2014.

**This is only part of the number of low income children in early childhood programs** see the next page for a chart that includes some of the other programs for low income children.

## Low Income Children under the Age of 5 Enrolled in Programs In Dane County March 2015

In each zip code this chart adds to Wisconsin Shares' numbers, the low income children on Head Start, public school 4K, public school Pre-k, the University of Wisconsin Child Care Tuition Assistance Program, and The City of Madison's tuition Assistance Program. There may be some duplication since children might be on more than one program. This chart does not encompass all of the possible public and especially private assistance programs so it is most likely an undercount of the number of low income children being served. There is also an additional 489 low income older school age children served outside of the Shares system. 871 of children under "other subsidies" below are in city accredited programs.

## COMPARISON BETWEEN WHERE CHILDREN ON SUBSIDY LIVE AND ARE IN CARE 2015

About half of all low income children on Wisconsin Shares subsidies are in care outside of the zip codes in which they live. This chart compares aggregate numbers of where children live and where they are in care by zip codes. The zip codes with negative differences are places where either there is not enough care or enough work for low income families to do.

Schoolage	21	0	53	990	1043	1087	14%

## Children Enrolled in Accredited Care by Zip Code March 2015

Accreditation is one process by which an early childhood program can be certified as meeting higher standards than those required by state regulation. There are several types of accreditation available to programs including one done by the City of Madison child care unit which set up a local accreditation program before any national ones existed. This chart shows the number of children in high quality accredited care within the county. The percent enrolled in accredited programs column is the percent of all children enrolled in care that are in accredited programs.

## The YoungStar Child Care Rating System

### THE YOUNGSTAR CHILD CARE RATING SYSTEM

YoungStar is Wisconsin's child care quality rating and improvement system. Child care programs are objectively measured and awarded up to five stars. Child care programs and providers are supported in achieving their quality improvement initiatives with on-site technical consultation, microgrants and opportunities for training. For families, YoungStar is available to provide support in making an informed choice about who will care for your children. Families can seek further support with a customized referral through 4-C, the Southern Region's child care resource and referral agency. For more information, call 1-888-713-KIDS(5437)

### WHAT DOES EACH STAR RATING MEAN?

Each star rating is based on these four categories of quality:

**Provider Education and Training** - Children benefit when their teachers and caregivers have a solid foundation in early care and education principles and practices. YoungStar acknowledges the academic achievement of teachers/caregivers and administrators.

**Learning Environment and Curriculum** - When teachers and caregivers create meaningful experiences for children, they are more likely to have long-term school and life success.

**Business and Professional Practices** - How programs do business matters. Well-respected, fairly-compensated professionals, who are actively maintaining professional standards and business practices and engaging families, are better able to respond to meet the needs of children and their families.

**Health and Wellness** - Children grow up in the context of their families, communities, and culture. These standards look at the outcomes of the whole child from nutrition and physical activity to meeting special needs and being responsive to how kids form relationships.

### HOW DO PROVIDERS EARN THEIR STAR RATING?

Star ratings can be earned in any of the following ways:

- YoungStar 2,3,4 or 5 star rating- based on a 40 point criteria and verified with a Youngstar rater
- Automated 2 star rating - program signs a contract agreeing to participate in YoungStar, however chooses not to participate in technical consulting and microgrants
- Automated 4 or 5 star rating – awarded to programs with an approved accreditation

For more information about star rating requirements, visit: [http://dcf.wi.gov/youngstar/pdf/minimum\\_points\\_required.pdf](http://dcf.wi.gov/youngstar/pdf/minimum_points_required.pdf)

**Child Care and Early Childhood Education in Madison  
A Neighborhood Analysis March 2015**

**Explanation of the charts:**

A map for the census tract areas follows. All data relates to programs regulated under state law in March 2015. In a number of tracts there is additional unregulated care provided –especially school age care in public and private schools .

Infant –Toddler. is the count of children under 2 in early childhood programs in March 2015.

Preschool is the count of children age 2 through age 5 in early childhood programs in March 2015.

School Age is the count of children 6 years old or older in early childhood programs in March 2015.

Total Capacity is number of regulated slots in March 2015

Excess Capacity is the difference between regulated capacity and total enrollment. **It may underestimate** the number of available slots due to some children attending part time- **part time programs are included in the enrollment and capacity totals.** Some Madison census tracts boundaries are different from City of Madison boundaries which is why the totals for this chart sometimes differ from totals for the City of Madison based on actual boundaries used elsewhere in this report.

# City of Madison 2000 Census Tract Jan 2007

## Legend

- 2000 Census Tract
- 2000 Census Block Group
- Madison City Boundary

Prepared by City of Madison Department of Planning and Development, PlanningGIS

### Market Share of Accredited Program Enrollment by Census Tract March 2015

Accredited program totals are based on City Accredited programs. Negative numbers in excess capacity are due to multiple part time children filling single slots. There are also some accredited programs just outside the city and not included in this chart. 4-C can do additional analysis upon request.

## Children Enrolled by City of Madison Municipal Planning Districts 2015

A Planning District Map can be found on the City of Madison website in the Planning Department under Neighborhood Indicators. A small copy is included in this report. E codes are East. W Codes are West. C is Central. Totals may differ from other charts as Planning Districts sometimes include space outside the city limits.

PD Code	Madison Planning District	Infant		School Age	Total Enrollment	Wisconsin Shares	% on Shares	City Accredited	% Accredited
