Our vision

Redesign the existing facade with a modern and naturalistic approach using “Vesta Steel Siding”

‘Coal’

Vest Steel Siding

‘Aged Walnut’

Vest Steel Siding

Iconic modern look, engineered to last

Made from recycled material and is 100% recyclable

Natural, variegated woodgrain, without any maintenance

Unmatched impact resistance that does not weather or crack

Reduces carbon footprint

Coal siding used on commercial building

Coal facade on commercial building

Coal Vesta Steel Siding

bold hues and realistic woodgrain finishes

Proposed Canopy

The canopy is intended to shelter visitors from any outdoor elements. The canopy is constructed with steel pilings that will support the structure. The canopy itself will be made of aluminum extrusions that will hold in place the greenhouse glazing to represent the system that we currently use for our projects.
