Subject: Grandview Commons - item #6

I was very disturbed to learn that the plans for implementing the grocery store project included cutting down the old, mature trees on the lot in back of my condo home on Kilpatrick Lane. One of the reasons I purchased there was because the backyard "included" those trees. They provide a windbreak, a sound barrier, bird hAbitat and shield against city lights. There is no need to cut them down. Their presence will not impede development or parking access. Indeed, their presence will add aesthetic dignity to the project and will help to shield the condo owners from the parking lot lights.

Please keep the trees.
