

To: Tim Parks and The Plan Commission,

I just wanted to update you since my last letter because Barriques has had 3-4 more months to correct there problem. I still have seen GRAYISH-YELLOW SMOKE coming from Barriques that was rolling down Parr Street. There has been many days the odor has been really bad. This week every day I've smelled the unpleasant odor of roasting coffee beans from Barriques. I still believe that Barriques should not get there conditional use permit. There hasn't been any improvement. I strongly believe that my health and welfare are being significantly compromised by smelling the exhaust from the coffee roasting process.
