Subject: Jenifer street reconstruction
Date: Tuesday, February 02, 2016 5:26:43 PM

I am writing in hopes to keep the 40+ trees slated for removal.

I am new owner in the neighborhood with my fiance. We decided to purchase here despite recommendations from our buyer agent to look at the near west side. One of the swaying factors was the look and feel of the tree canopy. After further research about the happiness, shade, and air quality trees provide, we are even more proud of our tough real estate descion. My hope is that you will consider the competitive advantage of our urban neighborhood over the suburbs and downtown concrete neighbirhoods. Notice that most real-estate listings on jenifer street include a picture of the canopied street.
