

MADISON AREA MUNICIPAL STORMWATER PARTNERSHIP 2020 ANNUAL INFORMATION AND EDUCATION WORK PLAN

DISTRIBUTED TO PARTNERSHIP MEMBERS ON NOVEMBER 26TH, 2019

The Madison Area Municipal Stormwater Partnership (MAMSWaP), under the auspices of a five-year memorandum of understanding through 2024, currently consists of 22 entities that have agreed to jointly implement stormwater outreach to reduce negative stormwater impacts. Members include the Cities of Fitchburg, Madison, Monona, Middleton, Stoughton, Sun Prairie and Verona; the Villages of Cottage Grove, Cross Plains, DeForest, Maple Bluff, McFarland, Shorewood Hills, Waunakee and Windsor; the Towns of Burke, Blooming Grove, Madison, Middleton, Westport; Dane County and the University of Wisconsin–Madison.

The MAMSWaP Information and Education (I&E) Committee assists the Dane County Stormwater Education Coordinator (SWEC) with development and implementation of projects and plans. Regular participation on the I&E Committee has included representatives from the Cities of Fitchburg, Madison, and Stoughton, Village of DeForest, Town of Westport, Dane County, Madison Metropolitan Sewerage District (MMSD), Wisconsin Department of Natural Resources (WDNR), AECOM, the University of Wisconsin Extension and UW Madison.

The MAMSWaP Annual I&E Work Plan seeks to meet or exceed the minimum requirements and elements outlined in the current WPDES Permit Number WI-S058416-4 (effective July 1, 2019 – June 30, 2024 and continuing until permit re-issuance); and, WPDES Permit Number WI-S050075-03 for the Village of Cross Plains, by developing and implementing a coordinated, regional outreach effort using consistent messages among and between communities to reduce the quantity and improve the quality of urban stormwater runoff and identify and eliminate illicit discharges. Numbered items are the specific elements from the permit language. Proposed programs and activities addressing the following required permit elements for 2020 are listed in Table 1.1.

- 3.1.4.1** Promote detection and elimination of illicit discharges and water quality impacts associated with such discharges from municipal separate storm sewer systems.
- 3.1.4.2** Inform and educate the public about the proper management of materials that may cause stormwater pollution from sources including: automobiles, pet waste, household hazardous waste and household practices.
- 3.1.4.3** Promote beneficial onsite reuse of leaves and grass clippings and proper use of lawn and garden fertilizers and pesticides.
- 3.1.4.4** Promote the management of streambanks and shorelines by riparian landowners to minimize erosion and restore and enhance the ecological value of waterways.
- 3.1.4.5** Promote infiltration of residential stormwater runoff from rooftop downspouts, driveways and sidewalks.
- 3.1.4.6** Inform and educate those responsible for the design, installation and maintenance of construction site erosion control practices and stormwater management facilities on how to design, install and maintain the practices.

- 3.1.4.7** Identify businesses and activities that may pose a stormwater contamination concern and educate those specific audiences on methods of stormwater pollution prevention.
- 3.1.4.8** Promote environmentally sensitive land development designs by developers and designers, including green infrastructure and low impact development.

Municipal Responsibilities

It is not enough for municipalities to merely be an actively paying contributor to the Partnership. There are specific actions each municipality must do. For example, while MAMSWaP has created a useful website, each municipality needs to link to www.ripple-effects.com. Other examples include:

- using provided articles and other information in municipal newsletters or utility bill inserts,
- promoting MAMSWaP campaigns, events and trainings,
- providing information on municipal web sites,
- issuing press releases to local newspapers, and
- implementing storm drain marking programs.

Municipalities must document in their reports to DNR how they have implemented outreach campaigns and used the materials developed by the I&E Committee.

Additional Activities and Ongoing Tasks

There are some administrative tasks and ongoing programs that must be performed every year that are essential to the program and need to be accounted for in the annual work plan. Following is a partial list of those tasks.

1. Quarterly reporting to member municipalities
2. Annual reporting to DNR.
3. Billing municipalities and track payments.
4. Developing annual work plans.
5. Updating and maintaining the www.ripple-effects.com website.
6. Continuing to be an active partner of WI Salt Wise
7. Continuing to promote North American Stormwater and Erosion Control Association Wisconsin Chapter events.
8. Developing and distributing outreach tools and articles to municipalities, friends groups, community groups and neighborhood association newsletters.
9. Developing and providing presentations (PowerPoint, demonstrations, etc.) focused on audience interests/concerns.
10. Continuing to maintain and use existing list serves and distribution lists to disseminate info.
11. Continuing to provide organizations and community groups assistance and partnering with projects (presentations, displays etc. for communities).
12. Continuing to promote and support storm drain marking programs with supplies and other materials.
13. Promoting the stormwater curriculum developed for MAMSWaP.
14. Publicizing training for building inspectors, contractors and staff.
15. Publicizing the availability of the Dane County Erosion Control and Stormwater

Management Manual.

16. Promoting use of the Enviroscape model and Rainfall Simulator.
17. Continuing to coordinate outreach with partners such as the Rock River Stormwater Group, Madison Metropolitan Sewerage District and others.
18. Continuing to actively participate in the Statewide Stormwater Collaborative group to learn from other stormwater groups across the state and discover possible projects to partner on.
19. Continuing to actively participate in the Statewide Stormwater Collaborative group to learn from other stormwater groups across the state and discover possible projects to partner on.

Acknowledgments

The Madison Area Municipal Stormwater Partnership's 2020 Annual Information and Education Work Plan was developed by the MAMSWaP I&E Committee. Committee member expertise, input and municipal cooperation was crucial for plan development and will continue to play an integral role in addressing stormwater runoff in Dane County. Thank you to everyone who helped.
