Subject: SW Bike Path Lighting

Dear council members,

I am unable to attend this evenings hearing, however as a neighbor to the path I want to express my support for the lighting project. My husband and I use the path regularly for biking and walking. Although we both have front and back bike lights, adding the lighting makes the path much more friendly for use at night and early morning. We have had friends who have come for dinner riding the path from the downtown end and said how grateful they were for the one test light on their ride back in the dark (even with bike lights). We feel the work that has been done to direct lighting downward is excellent and LED lighting makes the lights much more efficient. We support this good effort.

Thank you for you work on this project.

Sincerely,

Donna Wilson
