Subject: General Park Inquiry

Comments / Questions:

Greetings. I read with interest about the fireworks show that will occur at Breeze Steven's Field on July 2. Big Top Sports and Festival Foods claim it got to expensive to have Shake the Lake because they had to close down a state Highway for an entire day. That is not correct. John Nolan Drive is a federal highway. It is part of US Highway 151 which is what East Washington Avenue is. That is also part of US Highway 151. If these people don't know what roads they are closing then how can anybody trust them when they say that the debris from the fireworks will just disappear into thin air before it hits the ground or someone's house. I don't believe that. There will always be some form of pollution or trash coming from these fireworks. I had to endure an illegal fireworks show at the shelter house at 502 Walter Street at Olbrich Park on July 3 , 2021 I had to endure it for over 4 hours. Yes 4 hours with absolutely no response from the park's department. Multiple calls where made to the park's ranger and nothing. Multiple calls where made to the police department and no response. Will East Washington Avenue be closed at anytime on July 2? If so will Big Top and Festival Foods get the authorization from the US Dot to do it? Can the Madison Park's Department guarantee to me and the neighborhood surrounding the above shelter house that there will not be a repeat of the illegal fireworks show of last year occurring there this year and if it does happen can you guarantee me and the neighborhood that you people will shut it down? I will await your response.
