January 7, 2007

Gentlemen,

We the signers of the attached petition would like to recognize and appauld the hard work and long hours that have been extended into the production the Burke, Village of De Forest, City of Sun Prairie, City of Madison Cooperative Plan. However; it appears that little, if any thought was given to the conservation of one of Dane county's most important ecological resources, Token Creek. Therefore in accordance with the 31 August, 2006 letter from The Town of Windsor (a copy is attached), we the petitioners land owners/ residents prefer that our properties be placed into the Town of Windsor (see attached map).

This request is due to the Town of Windsor's commitment to the preservation and conservation of Token Creek, its' wildlife and habitat. It would be of a greater benefit to have has much of the Token Creek Conservancy area as possible under one municipal jurisdiction rather than several jurisdictions. This would promote a smoother working relationship with the Wisconsin DNR and the Corps of Engineers. It would promote a more uniform and fluid preservation plan for the area which would be beneficial to the entire population of Dane county and southern Wisconsin.

Please contact the undersigned with any questions at 608-244-8036.

Respectively submitted,

Curtis P Jahn

RE: Windsor Comments
Burke Cooperative Plan

Dear Administrator Volkmann:

Windsor submits the following comments regarding the cooperative plan proposed between the Town of Burke, the Village of DeForest, the City of Sun Prairie and the City of Madison:

- The potential for significant residential development in the area proposed for assignment to the City of Madison is a concern to Windsor. The cooperative plan allows up to 50 single-family residential units per year per subdivision. The cooperative plan allows the transfer of units between subdivisions. The cooperative plan allows the substitution of single-family units for multi-family units at a ratio of 3.3 multi-family dwelling units per single-family unit. Windsor is concerned about the potential for a large number of small subdivisions that may occur to maximize residential development, impacting the DeForest Area School District. While Windsor and DeForest have been careful to require forms of project phasing to help temper the impacts of growth on the DeForest Area School District, we see no similar controls for the post-Burke area contained in the proposed plan. While the DeForest Area School District has a long-standing familiarity with the practices and land use plans of Windsor and DeForest, such is not the case with the major changes proposed for this area. More attention needs to be paid to potential impacts.
- For proper regional planning to occur, the proposed cooperative plan does not incorporate and recognize the Windsor Land Use Plan and growth areas in Windsor along the Highway 19, Highway 51 and Interstate 39/90/94 corridors. As the neighboring community most impacted, Windsor believes it is necessary to have the Windsor's land use plans recognized by Sun Prairie, Madison and DeForest in order to correct this serious planning omission.
- Windsor requests that Windsor statistics be referenced in Section 15 of the proposed plan.
- We understand that the proposed agreement, and particularly the assignment of territories, has generated considerable discussion and concern among Burke residents. If it would assist in alleviating some of these concerns and contribute to logical provision of future services, Windsor is open to considering having certain parcels assigned to Windsor as an alternative. Windsor was approached early in your process about this option, but then heard nothing more. Since the announcement of the proposed plan, some Burke residents have inquired to Windsor about this option.

- Based on comments voiced at the public hearing and subsequently made to Windsor officials, this may be an option that Sun Prairie, DeForest and Madison may find of benefit due to service issues and that Burke residents may find appealing. These comments have focused on : (1) the possibility of scattered Burke parcels north of Hwy. 19 going to Windsor, such as the few homes just south of Windsor's Raintree and Wynbrooke neighborhoods; (2) the area immediate to "Old Token Creek" going to Windsor, uniting the Burke and Windsor areas of the rich historical community of Token Creek; and (3) whether the tier of small parcels south of Hwy. 19 to the west of old Token Creek might not be a better fit with Windsor, especially given Windsor's commitment to protecting the Token Creek Conservancy area. With many of these small border areas, Windsor maintenance and snowplowing equipment , for example, already service immediately adjacent lands.

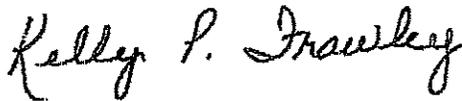

Thank you for providing the opportunity to offer comments. Please feel free to contact Windsor officials should you have any questions or need additional information.
