Hi,

I understand that your committee is considering some partial street closures to support proper distancing given that there is now a higher level of pedestrian and bike traffic.

I live at the Brearly Street end of Sherman Avenue, which is getting a lot of such traffic. When out for a walk, it is often necessary to move out to the road to avoid other pedestrians, but then cars are the hazard (although there is a much lower level of motorized traffic than usual). It would be great if Sherman Ave – at least from Brearly to Baldwin – could be closed to all but local traffic, deliveries, and safety vehicles.

Thanks,

Tom Reps
