

Crude rates of Asthma, Diabetes, & Childhood Obesity

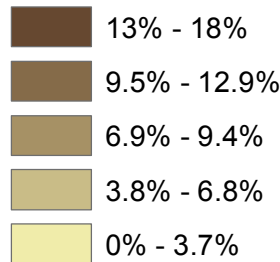

Asthma all ages

Childhood Obesity

Type II Diabetes

There were 308 Dane County census block groups identified within PHINEX, containing data on 280,842 de-identified individuals. A total of 200,420 were ages 18 or higher. The average number in census block group was 912, and ranged from 11 to 4,121.

The rates of chronic disease were calculated by census block group, dividing the number of individuals with the condition in the PHINEX dataset by those without.

Flood, T., Hanrahan, L., Tandias, A. (2014). PHINEX (Public Health Information Exchange) crude rates of Asthma, Diabetes, & Childhood Obesity.
