

## **MEMORANDUM**

Date: March 25, 2026

To: Water Utility Board

From: Joseph Grande, Water Resources Manager  
Krishna Kumar, General Manager

Subject: Water Production Report

## **BACKGROUND**

Board governance policy requires that current and future customers will receive water that meets or exceeds industry-accepted levels of service for fire protection and pressure.

This includes:

1. Water delivered to hydrants at proper flow rates for fire protection.
2. Water delivered to the customer tap at a pressure that meets industry-accepted low, high, and emergency operation criteria.
3. Water used for outdoor irrigation under drought-free conditions.

The Water Resources section of the Utility strives to meet or exceed the expectations laid out above. The February Water Production and Well Utilization reports reflecting these efforts are attached. Because there are no wells off-line for repairs or upgrades, there is no Attachment C this month.

## **ATTACHMENTS**

- A. Water Production Report as of February 28, 2026
- B. Well Utilization Report as of February 28, 2026
