## Summary

At its meeting of March 4, 2026, the Urban Design Commission **RECEIVED AN INFORMATIONAL PRESENTATION** for a major alteration to a previously approved Planned Development (PD) for the Dane County Rodefild Landfill located at 7905-7913 E Buckeye Road. Registered and speaking in support were Wyeth Augustine-Marceil, and Allison Rathsack. Registered in support and available to answer questions was John Welch.

Summary of Commission Discussion and Questions:

The Commission clarified that the landscape plans shared were representative of the plant palette, but not necessarily of the area being looked at here.

The Commission inquired about the wheel spoke in the aerial. The applicant replied it was a manmade wetland, required as an offset to wetland disturbance. It is now stocked with flora and fauna.

The Commission noted a good mix of heavily native plants in the landscape palette, suggesting the applicant lean heavier on native Oak trees being the most impactful in terms of ecological benefits. Those should be increased in the plan.

## Action

Since this was an **INFORMATIONAL PRESENTATION**, no formal action was taken by the Commission.
