re: Letter of Intent for a Shed Permit

To Whom It May Concern,

I wish to place a pre-built, 8'x12' gardening shed on my property. The shed is used for storing gardening equipment and sporting goods. The shed specifically allows us to share gardening and landscaping tools and supplies as well as boating, skiing, camping and other sporting goods by giving the lock combination to neighbors and friends with whom we share, or to whom we lend these items.

The shed is mounted on skids, and will be place directly on the ground, with no permanent foundation of any kind.

The shed is constructed of wood, with an asphalt shingle roof.
