

I am writing to register my complaints and to support other neighbors who have been adversely affected by the seriously strong and unpleasant noise and odors which emanate from THAT BBQ JOINT located at 901 Williamson St. I live just up the hill on Jenifer St. so am constantly aware of the most unpleasant smell of the meat smoker and of the very loud fans which attend the business. The fans are on the backside of the business so the noise and odors directly meet the residential area a block up the hill. A good business community thrives on Williamson St. but this business seems to be managed by an owner who is able to leave the area in the evening and to let the residents suffer the unacceptable levels of odors and noise for 24 hours each day. Such conditions were not included in the business plan during neighborhood review; please review the liquor license with great consideration of the environmental difficulties caused by THAT BBQ JOINT. Thank you, Joan Hart
