

Comments from 11\14\13 Habitat Stewardship Sub Committee meeting re Land Management Draft Plan:

- Would like to see a glossary of terms
- Spell out training requirements for Volunteers who participate in controlled burns
- In the lead narrative make mention that Conservation parks have different, higher standards
- Particularly in the Woodland section mention native thinning as well, not just invasive removal
- Integrated Pest Management (IPM) – mention opportunities to control and manage lands without using herbicide, or at least emphasize it more.
