

## **Internal Monitoring Report**

**Policy #:** O-2A Water Quantity

**Monitoring Frequency:** Monthly

**Date:** February 22, 2022

### **Policy Language:**

*Current and future customers will receive water that meets or exceeds industry-accepted levels of service for fire protection and pressure.*

*This includes:*

- 1. Water delivered to hydrants at proper flow rates for fire protection.*
- 2. Water delivered to the customer tap at a pressure that meets industry-accepted low, high, and emergency operation criteria.*
- 3. Water used for outdoor irrigation under drought-free conditions.*

Please see the attached Monthly Water Production and Unit Well Cumulative Capacity Utilization Reports as of January 31, 2022. The water production and unit well capacities are in line with the policy parameters outlined above.

### **Attachments:**

- A. Monthly Water Production Report as of January 31, 2022
