

Petition Against Proposed Bike Path in the Sauk Creek Greenway

We, the undersigned are in strong opposition to the construction of a bike path in the Sauk Creek Greenway as proposed by the City of Madison because such a bike trail: (i) goes against the City's Stewardship/Green values by reducing a Tree Canopy and adding impervious surface; (ii) the 2015 Bike Plan said there is NOT a bike network gap in the neighborhood; (iii) the 2000 Bike Plan said it is not a priority since a Primary bike path on Westfield Road exists (now more safe with speed bumps) and a Secondary bike path on High Point Road are within 1000'+feet; (iv) it does not have a connecting destination. Therefore, the proposed bike path should be removed from the West Area Plan and SC Greenway City Engineering project.

Petition Against Proposed Bike Path in the Sauk Creek Greenway

We, the undersigned are in strong opposition to the construction of a bike path in the Sauk Creek Greenway as proposed by the City of Madison because such a bike trail: (i) goes against the City's Stewardship/Green values by reducing a Tree Canopy and adding impervious surface; (ii) the 2015 Bike Plan said there is NOT a bike network gap in the neighborhood; (iii) the 2000 Bike Plan said it is not a priority since a Primary bike path on Westfield Road exists (now more safe with speed bumps) and a Secondary bike path on High Point Road are within 1000'+feet; (iv) it does not have a connecting destination. Therefore, the proposed bike path should be removed from Complete Green Street Guide, West Area Plan and SC Greenway project.

Petition Against Proposed Bike Path in the Sauk Creek Greenway

We, the undersigned are in strong opposition to the construction of a shared bike path in the Sauk Creek Greenway ("Greenway") as proposed by the City of Madison Engineering Division. Such a bike trail would: (i) be dangerous to other users in the Greenway and would result in the loss of existing trees and other vegetation; (ii) conflict with the use of the Greenway and adjacent Walnut Grove Park by small children, nearby elderly residents, dog walkers and families from nearby apartments; (iii) the Greenway is already rimmed by bike lanes on Westfield Road, High Point Road, Old Sauk and Tree Lane. Furthermore, the neighbors were not properly notified that a public bike path through the Greenway was incorporated in the MPO 2015 bike transportation plan; therefore, it should be removed.

Petition Against Proposed Bike Path in the Sauk Creek Greenway

We, the undersigned are in strong opposition to the construction of a shared bike path in the Sauk Creek Greenway ("Greenway") as proposed by the City of Madison Engineering Division. Such a bike trail would: (i) be dangerous to other users in the Greenway and would result in the loss of existing trees and other vegetation; (ii) conflict with the use of the Greenway and adjacent Walnut Grove Park by small children, nearby elderly residents, dog walkers and families from nearby apartments; (iii) the Greenway is already rimmed by bike lanes on Westfield Road, High Point Road, Old Sauk and Tree Lane. Furthermore, the neighbors were not properly notified that a public bike path through the Greenway was incorporated in the MPO 2015 bike transportation plan; therefore, it should be removed.

Petition Against Proposed Bike Path in the Sauk Creek Greenway

We, the undersigned, are in strong opposition to the construction of a bike path in the Sauk Creek Greenway as proposed by the City of Madison because such a bike trail: (i) goes against the City's Stewardship/Green values by reducing a Tree Canopy and adding impervious surface; (ii) the 2015 Bike Plan said there is NOT a bike network gap in the neighborhood; (iii) the 2000 Bike Plan said it is not a priority since a Primary bike path on Westfield Road exists (now more safe with speed bumps) and a Secondary bike path on High Point Road are within 1000'+feet; (iv) it does not have a connecting destination. Therefore, the proposed bike path should be removed from the West Area Plan and SC Greenway City Engineering project.

I wish I could've gotten other signatures but a lot of my neighbors are elderly snowbirds!
