4. Detailed plans for site grading, filling, and any retaining walls.
5. Contextual information related to the five buildings on either side or within 300 feet on either side of the subject property (whichever is less). The required minimum lakefront yard may be either:

The average distance between the OHWM and the principal buildings on the two adjoining lots, provided these distances are within 20' of one another.

OR

The median setback of the principal building on the five (5) developed lots or 300 feet on either side (whichever is less). If this method is utilized, the established setback must be no less than 30% of the lot depth of the subject property, and could be more, based on the placement of buildings as measured to establish the median.

For the purposes of determining the OHWM, use the following base elevations: Lake Mendota 850.7 National Geodetic Vertical Datum (NGVD) and Lake Monona 845.82 NGVD.
