

Agenda Item #26 ID#06988  
Amendment - Ald. Clear

The GDP should provide that the height of buildings on the site shall be reviewed on a case-by-case basis in each SIP, but that proposed buildings in zones B and C which are proposed to be 15-20 stories shall be approved only if exceptional building design, the provision of substantial public or private open space, sustainable design characteristics, or other circumstances justify such height.
