All.... below are Long Range Transportation Planning Commission's recommended changes (underlined) to Resolution ID 12771 ....last night they recommended adoption, pending inclusion of these modifications ....

=====

**NOW THEREFORE BE IT RESOLVED** that the development of the plan for Madison's Northeast Neighborhoods will be guided by the following goals:

1. Capturing 25% of all trips made by persons living in the development area by walking, bicycling or transit and/or reducing household motor vehicle miles of travel (VMT) by 25% (in comparison to a baseline to be determined by staff), through the use of transit oriented development, traditional neighborhood development, mixed use development, transit access for early neighborhood residents, transportation demand management plans, walkable environments, bike facilities, or other transportation demand management practices.
2. Reducing household consumption of natural gas and fossil fuel generated electricity by 25% compared to current city-wide household levels through the use of energy efficient construction, alternative energy sources, on-site energy production, conservation education and outreach, or other energy conservation practices.
3. Reducing residential per capita water use by 25% compared to current city-wide per capita levels through the use of low-flow appliances and fixtures, dual-flow and low-flow toilets, rain barrels, low-impact lawn care design, conservation education and outreach, or other water conservation practices.
4. Infiltrating 25% of the storm water volume on or adjacent to points of generation through the use of rain gardens, green roofs, porous sidewalks and drives, or other on-site stormwater management practices.

BE IT FINALLY RESOLVED that, as part of the Northeast Neighborhoods planning process, staff will develop specific implementation strategies to achieve these goals.
