## Agency/Project: Sewer Utility / All Projects Page(s): 54

Sponsors: Mayor Cieslewicz

Reduce Capital Improvement Program funding in out years 2012 - 2016 to the levels noted below. This level of funding will allow for maintenance of bond coverage ratios based upon the most recent information, while allowing for the replacement of infrastructure in an effective and efficient manner.

## Agency/Project:Planning and Community and Econ. Dev. / No. 15 - Neighborhood CentersPage(s):136Sponsors:Alds. Rhodes-Conway, Verveer, Rummel, Bidar-Sielaff

Amend project narrative to read: "This project provides funding to conduct a needs assessment and preliminary space study for potentially several new community centers in South and Southwest Madison. The City has been approached regarding financial assistance to move these various projects forward. Prior to any consideration of financial assistance, tThe assessment and study will provide solid baseline information on the need for these spaces centers, the location of any potential center(s) and the level of non-City support for moving the project(s) forward. In addition, the Community Development Division and the CDBG Committee are tasked with developing a policy and criteria for funding neighborhood centers including the level of City funding and setting priorities for how to allocate future capital and operating funding for neighborhood and community centers. The criteria to be considered include, but are not limited to: demonstrated need; capacity of existing facilities and projects; geographic diversity of existing centers; ability to fundraise; and comprehensiveness of the population served. The General Obligation debt of \$80,000 in 2011 is reauthorized from 2010. \$20,000 in other funding is from private contributions.

Funding in 2012 includes \$3.5 million in private fundraising/grants to support construction costs of a neighborhood center."

Note: For each amendment to the 2011 Capital Budget that includes General Obligation borrowing, the annual levy impact represents the estimated average annual debt service that will result from that borrowing. This debt service will be added to (or subtracted from) the Operating Budget in subsequent years. For 2011 projects, the first levy impact would not occur until 2012. The annual debt service will be the highest in the first year, declining over the term of the debt.
