

As a person who lives in the Spring Harbor Neighborhood, I wish to give my disapproval of the plans being submitted by Krupp Contractors. The area being considered is over our drinking water well and the area does have toxics that are and will be leaking into this vital water system.

The buildings proposed do not blend with the neighborhood and we are losing green space.

These plans do not do justice to the Erdman name, which is based on sustainable development practices and the importance of green spaces, conserving our pristine and irreplaceable natural resources.

Thank you for your time in reading my email and considering the importance of our neighborhood.

Respectfully,

Dian L. Phelan
