**Subject:** Erdman property

Please do not grant special historical status force the Erdman property on University Avenue. As a person who had an office there for nearly two years (within the last five years), I can speak from experience that the office buildings are way past there prime. They smell, the roofs leak, a very awkward layout and are generally falling apart. We often used the term "eyesore" for the interior and exterior.

I hope people do not attach any more significance to these buildings. It is time for something new and better. Please let UW Health continue to serve our community by expanding in this area.

Thank you,  
Tracey
