N Frances St. From University Ave  
to end of Cur-de-sac

① there are 3 goose necks now  
not including the corner on  
the eastside (my side), yes it is  
dark, Why hadn't the City addressed  
this issue when they replaced curb/  
gutter 10 years ago. 3 Goose necks  
there would not have been sufficient.

② I am objecting to another Cost to the  
property owner for sidewalk & Curb/Gutter  
as needed as we already paid once.  
This cost is to install the new red lights.  
[The City should pay 100% of this]

③ Pedestrian lighting - with <sup>the</sup> Huge Cost of  
these lights (\$7,000 each) and the property  
owner to pay 100% is outrageous, again.  
7 lights are proposed. According to  
Ordinance they can do this because they  
have deemed it new construction where  
in fact it is reconstruction, then they  
would pay a % I will be researching  
this <sup>with them</sup> when I return.

- 2 -

(4) If lighting is what is wanted  
(ped lighting is decorative) then more  
goose necks should be installed, at  
city expense.

The City goes back to the property owner  
over and over, with no say.

400 block of Bitman is prime example  
they assessed property owner twice in 6  
years for lighting and sidewalks.

Please defer this so the property owners  
can be a better part of the process

or City pay for all sidewalk / C + G  
replacement

and 50% of ped lighting - under  
reconstruct.
