Subject: quick comment on Proposal to Install Lighting along the Southwest Path
Date: Monday, November 19, 2012 2:21:12 PM

I am a bicycle commuter who travels on all or part of the Beltline to Breeze section of the Southwest Path about once or twice a month. Other people might feel differently, but I don't need additional lighting at all. Using a headlight and proceeding with relative caution at night are not problems for me.
