Subject: southwest bike path lighting

To Whom It May Concern,

I am strongly in favor of lights on the Southwest bike path in Madison. I know many people who avoid that path at night because they feel it is unsafe. I myself have avoided it at night time while either biking or running. This may keep many people from biking to work, especially in the winter when the sun sets much earlier. Lighting would help to make safer by illuminating debris and bumps in the path that can cause accidents. It would also help to reduce collisions caused by low visibility. So I urge you to please vote yes for the path lighting on the southwest bike trail.

Thank you,
