RE: proposed streetlight on Hauk Street

There has been much discussion over the years about safety issues in our neighborhood. The lack of adequate lighting on Hauk Street is an invitation to crime and other illicit activity that thwarts attempts by law enforcement, neighborhood associations and civic groups to improve safety and livability in the neighborhood.

In the four years I have been living at this address, I know of two residents who have been assaulted and robbed in this exact location. Adequate street lighting would help discourage such activities.

I support adding another street light to Hauk Street since the original lighting plan by the city does not adequately illuminate the street.

Thank you,
Gary Karch
