Re: Lake View Reservoir Reconstruction

The Board of the Friends of Lake View Hill Park supports the replacement of the water tower with one that may have more capacity to serve the community and has the least impact on the environment and operation of the park.

Specifically we do not support including a viewing platform, zip lines, a relocation of the older tower to another location in the park, or other activities that would be inappropriate for a conservancy park.

Further we request the opportunity to comment on the final design, aesthetic embellishments and color choices.
