---

amy - as we discussed can you forward this to the commission members? in order to maintain the live link you have to send it as a forward. if you want to make sure it works you can try forwarding it to yourself first. (apologies if you already know this stuff. i am still learning it myself. can you also cc it to me so i can see if it worked?) thanks.

commission members - here is the pic of 906 willy street taken in 2007 before the present owner (mike kohn) removed all the vegetation. i hope the picture gives some idea of the intimate feeling of the entire corner lot provided by this vegetation. the adjacent period commercial building is in the background.

unlike the 1300 block where the residential buildings are set back from the sidewalk, 906 and the other residential building in the 900 block are set even with the commercial buildings at the sidewalk. i am guessing that there used to be at least one more house on the block where the plan b parking lot is now.

to enlarge the picture below just click on it. you can also save the picture to your computer by clicking on the "download" strip underneath it and choosing the "save file" option. this will give a picture that you can adjust, mail out, etc.

thanks,  
peter
