Madison, WI 53701-2985
Karin Wolf, Madison Arts Program Administrator

RE: "Four Lakes" sculpture

Treatment summary:

The paint transfer was reduced with solvent mixture of 25% each of the following acetone, methanol, toluene, methylene chloride. It was gelled to hold in place on the vertical surface. The metallic component of the paint was then clarified with muriatic acid on a swab.

The entire surface was lightly polished with automotive glazing compound.

Total costs for treatment.....\$425.00

Respectfully submitted,

Craig Deller
Conservator.
