

Sheboygan Avenue Community Garden

Live, grow, eat.

Option D: Southeast Corner 4-Row

Southeast Corner 4-Row Garden Site - Attributes and Considerations:

- There are approximately fifty (50) 10x10 plots and eight (8) round beds
- The garden site has a mix of full sun and partial sun
- Water will be provided by metered access from the hydrant on Regent Street with possible water back
- Garden will provide any required water back
- Site surface is flat except for south side, some fill may be needed south of the water water table
- There are several surfaces on the site
- Removal of 2-3 (3) trees would likely be needed along south side, oak tree to remain
- An aesthetically pleasing perimeter fence with gates would connect access to rabbits, raccoons, etc.
- Fruit bearing shrubs or trees could replace dying trees
- Decorative fence and/or perimeter could line the south border
- Site location is in an unprogrammed area of the park and minimum impact on existing use
- Underground utilities are not an issue
- Equipment shed (green) and garden materials would be located in most unused area of park
- This option would provide enough space to replace approximately 17% of the lost garden space

Public Meeting

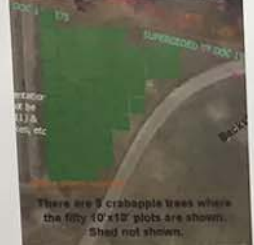

Consistent Presbyterian Church
 536 South Sagaw Road (corner of Mineral Point Rd)
 Madison, WI 53705

Thursday, January 21, 2016
 6:30 PM

Please join us for this public meeting to discuss the proposed to relocate Sheboygan Community Garden to Remembrance Park, District Alder Owen Bennett, City of Madison staff, University Hill Farms Neighborhood Association, and Sheboygan Community Garden will be on hand to discuss the proposal and collect community input.

The 2015 garden site was located at 4802 Sheboygan Avenue on the Hill Farm Department of Wisconsin property owned by the State of Wisconsin. In 2015, the garden site was relocated to the site of the former Sheboygan Community Garden. The garden site was relocated to the site of the former Sheboygan Community Garden. The garden site was relocated to the site of the former Sheboygan Community Garden. The garden site was relocated to the site of the former Sheboygan Community Garden.

Option A1: Near Tennis Courts with 100SF plots

There are 3 crabapple trees where the fifty 10'x10' plots are shown. Shed not shown.

Option A1 - Garden Site near Tennis Courts - Attributes and Considerations:

- There are approximately fifty (50) 10x10 plots with 1-2' spacing between or (21) 20x20 plots or a mix
- The garden site has full sun - at least 8 hours of direct sun each day
- Water will most likely be provided by metered access from park shaker
- Garden will provide any required water back
- Site surface is essentially flat and minimum raise off from the site
- Five relatively young crabapple trees would likely need to be removed
- An aesthetically pleasing perimeter fence would connect access to rabbits, raccoons, etc.
- Site location is in an unprogrammed area of the park and minimum impact on existing use
- Utilities are located at the perimeter of this site
- Provide a location close to multi-family housing and those who might be transportation limited
- Location of equipment shed is not included and other details would need to be developed
- This option would provide enough space to replace approximately 20% of the lost garden space

Option B: Tennis Courts & Backstop

Option B - Tennis Courts & Backstop Garden Site - Attributes and Considerations:

- There are approximately fifty (50) 10x10 plots and eight (8) round beds
- The garden site has full sun - at least 8 hours of direct sun each day
- Water will most likely be provided by metered access from park shaker
- Garden will provide any required water back
- Site surface is essentially flat and minimum raise off from the site
- There are several surfaces on the site
- Five relatively young crabapple trees would likely need to be removed
- The artificial baseball backstop is under utilized and could be removed and/or relocated
- An aesthetically pleasing perimeter fence with gates would connect access to rabbits, raccoons, etc.
- Site location is in an unprogrammed area of the park and minimum impact on existing use
- Utilities are located at the perimeter of this site
- Provide a location close to multi-family housing and those who might be transportation limited
- Location of equipment shed is included (green)
- This option would provide enough space to replace approximately 17% of the lost garden space

Option A2: Near Tennis Courts with 200SF plots

There are 3 crabapple trees where the fifty 10'x10' plots are shown. Shed not shown.

Option A2 - Garden Site near Tennis Courts - Attributes and Considerations:

- There are approximately fifty (50) 10x10 plots with 1-2' spacing between or (21) 20x20 plots or a mix
- The garden site has full sun - at least 8 hours of direct sun each day
- Water will most likely be provided by metered access from park shaker
- Garden will provide any required water back
- Site surface is essentially flat and minimum raise off from the site
- Five relatively young crabapple trees would likely need to be removed
- An aesthetically pleasing perimeter fence would connect access to rabbits, raccoons, etc.
- Site location is in an unprogrammed area of the park and minimum impact on existing use
- Utilities are located at the perimeter of this site
- Provide a location close to multi-family housing and those who might be transportation limited
- Location of equipment shed is not included and other details would need to be developed
- This option would provide enough space to replace approximately 20% of the lost garden space

Option C: Southeast Corner 3-Row

Southeast Corner 3-Row Garden Site - Attributes and Considerations:

- There are approximately forty (40) 10x10 plots and eight (8) round beds
- The garden site has a mix of full sun and partial sun
- Water will be provided by metered access from the hydrant on Regent Street with possible water back
- Garden will provide any required water back
- Site surface is flat except for south side, some fill may be needed south of the water water table
- There are several surfaces on the site
- Removal of 2-3 (3) trees would likely be needed along south side, oak tree to remain
- An aesthetically pleasing perimeter fence with gates would connect access to rabbits, raccoons, etc.
- Site location is in an unprogrammed area of the park and minimum impact on existing use
- Underground utilities are not an issue
- Equipment shed (green) and garden materials would be located in most unused area of park
- This option would provide enough space to replace approximately 10% of the lost garden space

Option E: East Side

East Remembrance Garden Site - Attributes and Considerations:

- There are approximately fifty (50) 10x10 plots and six (6) round beds
- Water will be provided by metered access from the hydrant on Regent Street with possible water back
- Site surface is elevated, some fill may be needed north and west of access area with
- Removal of two (2) large trees would likely be needed along south side. Removal of two (2) medium trees and mulch/mulch would be needed on east side, larger trees would remain with possible pruning
- An aesthetically pleasing perimeter fence with gates would connect access to rabbits, raccoons, etc.
- Site location is in an unprogrammed area, not closer than 10-15 ft to street (red)
- ADA compliant raised beds along path for access (could not be in multiple beds)
- Perimeter and perimeter garden plots (yellow) provide a visual fence and could be elevated over trees
- Small equipment building (20x10) provides shade to study, mulch storage (e.g., wood chips, high ground)
- 1.5m circumference, all items same size (and one), some water table, some open path, some
- This option would provide enough space to replace approximately 10% of the lost garden space
