

Hi,

I'm writing as a concerned Bay Creek resident about the current proposed plans for redevelopment of the Jade Garden site. I currently walk past this site daily on my way to work. My concern is for the 5-6 story proposal and how it will negatively affect the nearby residential area in terms of shading homes from sunlight. The large proposed building will significantly decrease the quality of life for nearby residents. I welcome and support new development and growth on the park street corridor, however, I believe this can be achieved by respecting the current 3-story traditional shopping street district plan. I urge you to support development that meets the needs of our current neighborhood residents while looking to the future.

Sincerely,
Jessica Dalby, MD
