

Project Name/Address: 1 Speedway Road, Forest Hill Cemetery
Application Type: Certificate of Appropriateness for exterior alteration of a landmark site
Legistar File ID # [46474](#)
Prepared By: Amy L. Scanlon, Preservation Planner, Planning Division
Date Prepared: March 9, 2017

Summary

Project Applicant/Contact: Corey Stelljes, City of Madison Parks Division

Requested Action: The Applicant is requesting that the Landmarks Commission approve a Certificate of Appropriateness for the proposed exterior alterations which include the construction of storm sewer, replacement of irrigation system, and replacement of pavement at the landmark site.

Background Information

Parcel Location: The subject site is bound by Speedway Road, rear yards of residential structures on Virginia Terrace, Glenway Golf Course, and the bike path.

Relevant Historic Preservation Ordinance Sections:

- 41.18 STANDARDS FOR GRANTING A CERTIFICATE OF APPROPRIATENESS.** A certificate of appropriateness shall be granted only if the proposed project complies with this chapter, including all of the following standards that apply.
- (1) New construction or exterior alteration. The Landmarks Commission shall approve a certificate of appropriateness for exterior alteration or construction only if:
 - (a) In the case of exterior alteration to a designated landmark, the proposed work would meet the Secretary of the Interior's Standards for Rehabilitation.
 - (b) In the case of exterior alteration or construction of a structure on a landmark site, the proposed work would meet the Secretary of the Interior's Standards for Rehabilitation.
 - (c) In the case of exterior alteration or construction on any property located in a historic district, the proposed exterior alteration or construction meets the adopted standards and guidelines for that district.
 - (d) In the case of any exterior alteration or construction for which a certificate of appropriateness is required, the proposed work will not frustrate the public interest expressed in this ordinance for protecting, promoting, conserving, and using the City's historic resources.

Secretary of the Interior's Standards for Rehabilitation

1. A property will be used as it was historically or be given a new use that requires minimal change to its distinctive materials, features, spaces, and spatial relationships.
2. The historic character of a property will be retained and preserved. The removal of distinctive materials or alteration of features, spaces, and spatial relationships that characterize a property will be avoided.

3. Each property will be recognized as a physical record of its time, place, and use. Changes that create a false sense of historical development, such as adding conjectural features or elements from other historic properties, will not be undertaken.
4. Changes to a property that have acquired historic significance in their own right will be retained and preserved.
5. Distinctive materials, features, finishes, and construction techniques or examples of craftsmanship that characterize a property will be preserved.
6. Deteriorated historic features will be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature will match the old in design, color, texture, and, where possible, materials. Replacement of missing features will be substantiated by documentary and physical evidence.
7. Chemical or physical treatments, if appropriate, will be undertaken using the gentlest means possible. Treatments that cause damage to historic materials will not be used.
8. Archeological resources will be protected and preserved in place. If such resources must be disturbed, mitigation measures will be undertaken.
9. New additions, exterior alterations, or related new construction will not destroy historic materials, features, and spatial relationships that characterize the property. The new work will be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportion, and massing to protect the integrity of the property and its environment.
10. New additions and adjacent or related new construction will be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

Analysis and Conclusion

As described in the submission materials, the applicant is requesting a Certificate of Appropriateness for the following work:

- Construction of storm sewer.
- Replacement of irrigation system.
- Replacement of existing pavement.
- Resurfacing of existing pavement.

The work described above will be constructed within the existing roadway where areas have been previously disturbed. The work will not affect areas near the burial mounds or near recent gravestones. The existing appearance will be retained and the function of the site will be improved.

Recommendation

Staff believes that the standards for granting a Certificate of Appropriateness for the proposed exterior alterations are met and recommends that the Landmarks Commission approve the request.
