Subject: Re Hotel Red application for increasing height

To whom it may concern:

I engaged with the original development of this site for this hotel. I agree they have made every effort to be a good neighbor, and I understand their fiscal motives. I do not, however agree with adding extra stories at this time. My objections are as follows:

- I believe the proposed plans for that triangle and the stadium would still make this an aberration, and as I do not believe they have been approved yet there is still much water to go under the bridge.
- There is a shade/light and overlook aspect to a considerably taller building. My house is not close enough to be in its shadow, but It will change the skyline for the worse.
- I am also concerned about increased traffic and parking needs. There is already a dearth of this for current residents.
